

Puppy-Mild

It is well known that dog's skin differs from human skin. Because of this, products such as shampoos which are formulated for dogs need to be pH-neutral so as to prevent skin irritations. This is even more so for puppies and is the reason why we have launched **Puppy-Mild** shampoo — specifically designed for puppies.

Composition

Low-foaming **Puppy-Mild** shampoo contains a unique blend of mild surfactants, conditioning agents, moisturisers and mildness additives to effectively clean but not strip the coat of its natural oils.

Discussion

Sebaceous glands, which produce natural oils that lubricate a dog's skin and coat, usually are underactive in puppies. As the dog ages, these glands will become more productive and will eventually generate sufficient oil to keep the dog's skin properly lubricated. Using a shampoo with mild surfactants will not strip the coat of natural oils and may prevent skin conditions such as dry, itchy skin.

Indications

Puppy-Mild shampoo can be used on puppies of all ages.

Directions For Use

Wet the coat with warm water. Use **Puppy-Mild** shampoo liberally to create a good lather. Wash well and rinse with warm water.

Packing

250ml

Storage

Store in a cool place (below 25°C).
